

# GET MOVING...

## DL1<sup>TM</sup>

DIGITAL LIGHT

DL1 (Digital Light 1)—the "bridge" between video and automated lighting.

Catalyst DL1 is a multifunctional digital lighting engine that can project virtual scenery and digital aerials.

Catalyst V3 software provides state-of-the-art, real-time rendering for total creative control of content.

**LEARN MORE!**  
about digital lighting and  
**CATALYST DL1** at 1.877.444.4363  
or [www.highend.com/CatalystDL1](http://www.highend.com/CatalystDL1)

As is standard  
with all High  
End equipment,  
Catalyst DL1 is  
ETL and CE  
approved.

Digital Aerials

## MAKE THE TRANSITION TO DIGITAL LIGHTING!

**Automated lighting and digital video unite!**—with High End Systems' new Catalyst DL1 digital lighting engine. Now you can incorporate virtually unlimited media content into the industry's most advanced (and best looking) moving light fixture.

**Imagine the possibilities.** Load images from DVDs, videos, graphic libraries and other media. Project anywhere in 360° of space with complete control over image size and shape. Along with Catalyst Software, Catalyst DL1 gives you complete and LIVE control over any kind of imagery—moving or static, subtle or overt, even digital aerials.

**Freedom.** Unlike conventional moving lights where the beam field has peaks and valleys, digital lighting creates a flat, even field with a high contrast ratio that provides uniformly bright output. All this within a fixture that rigs fast and looks great!

**MAKE THE TRANSITION . . .**  
**Move into the future of digital lighting with CATALYST DL1.**
